Titan Lenders Expands WLPR Offering

IN FYI BY MORTGAGEORB.COM ON FRIDAY 15 JULY 2011

Denver-based Titan Lenders Corp. is now offering its Whole Loan Purchase Review (WLPR) service to institutional and correspondent investors.

According to the company, WLPR enables investors to vet standard and negotiated contract terms and variances per investor and loan, providing visibility to loan quality, pricing, and suitability with the scoring of loan pipelines. The service facilitates investors' "hands on" management of compliance, fraud risk, data integrity, income and valuation, servicing data, and potential integration with secondary markets and/or rating agencies, the company adds.
